SUMMARY

Motivated fourth-year undergraduate BS Information Technology student at Ateneo de Naga University with a strong foundation in front-end development, project management, and modern collaboration tools. Skilled in leveraging emerging technologies to design efficient and user-focused applications. Recognized as a quick learner and dependable team player with strong problem-solving abilities, eager to contribute technical expertise and innovative solutions in professional settings.

WORK EXPERIENCE

Senior Capstone Project

June 2025 - Present

- Currently developing a responsive web and mobile application called Beepney, which aims to enhance the commuter experience by providing quality services for both commuters and drivers of public transportation.
- Utilized frameworks such as React Native and Expo Go for mobile development, and Next.js for web development.
- Jira for project management.
- **Additional:** Features of our application are **cashless fare payment, view specific locations of public transportation terminals through map** (it includes the number of available different types of public vehicles, the start and end time of the operation, and its destination), **fare calculator, ride-hailing for tricycle drivers, sos call, report, and file a complaint, etc.**

EDUCATION

BS IT- Undergraduate
Ateneo de Naga University

2022 (Present)
